DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 05/18/2005 have been fully considered but they are not persuasive. Applicant's core argument that Bjaerum does not expressly describe, or inherently disclose, an apparatus for generating and displaying a plurality of strain rate spectrums in response to Doppler data generated by an ultrasound system. The examiner respectfully disagrees. Bjaerum teaches in Figs. 1, 8, and 11, a method and apparatus for generating and displaying a plurality of strain rate spectrums (153) in response to Doppler data generated by an ultrasound system (5) comprising the steps and structures for performing strain rate processing in response to the Doppler data to generate the plurality of strain rate spectrums in real-time and displaying the spectrums as a function of time.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 9-14, and 22-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Bjaerum et al. (US 6,579,240 B2).

Bjaerum teaches in Figs. 1, 8, and 11, a method and apparatus for generating and displaying a plurality of strain rate spectrums (153) in response to Doppler data generated by an

Application/Control Number: 09/683,893

ultrasound system (5) comprising the steps and structures for performing strain rate processing in

response to the Doppler data to generate the plurality of strain rate spectrums in real-time and

displaying the spectrums as a function of time.

Allowable Subject Matter

4. Claims 2-8 and 15-21 objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

5. Claims 27-31 are allowed.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ali Imam whose telephone number is 571-272-4737. The

examiner can normally be reached on Mon. - Th., 8:00-6:00.
